

ROUND GULLY GRATE

B125 and D400

13.300

Product description

- Round gully grate
- Water based black painting

Installation location

- Class B125 - Footways, pedestrian areas and comparable areas, car parks or car parking decks
- Class D400 - Carriageways of roads (including pedestrian streets), hard shoulders and parking areas for all types of road vehicles

Standards

- EN 124-1/2

Features

- Ductile cast iron grate and frame (EN-GJS-500-7) with water based black painting
- Gully with non-slip raised pattern according to EN 124-1 designed to allow quick and easy installation
- Personalization of the gully with inscriptions in high relief with minimal quantities
- **Gully grate series Eixo e Dobradiça**
 - Hinge system with self-cleaning system, simply opening of the gully at 120° and safety 90° blocking system. Fit and remove is making through moving the gully to 90° and lift clear
 - Innovative system of conical closing that due to the ramped design, both frame and lock, the gully closes automatically with its own weight or the weight of the first vehicle which passes over. Also allowing the gradual adjustment of the lock with the conical cavity for it in the frame maintaining the absence of glitches. Locking system which allows that the gully cover can be opened by the inside. If necessary, the lock can be easily replaced, since it's an independent piece
 - Frame prepared to install the anti-theft system
 - Elastic seating which assures the gully perfectly fits the frame and also gives stability and silent operating even in high traffic intensity.
