VALVE & FITTINGS

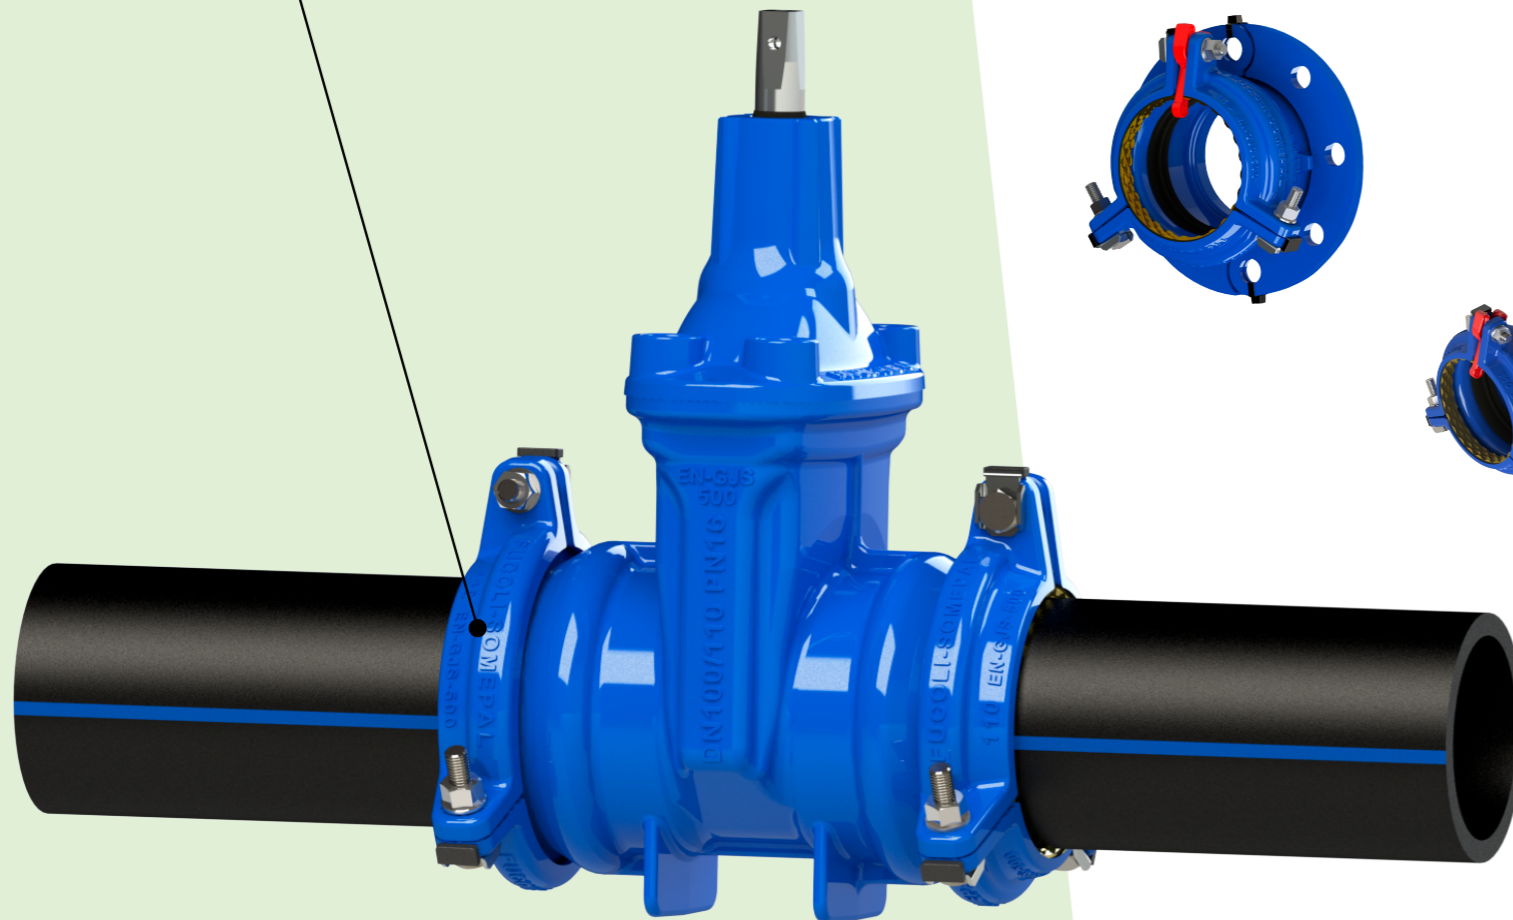

SYSTEM BLOCKPLUS

STOP TAB
Polypropylene

GRIP RING
Brass

LIP SEAL RING
EPDM (water)

BENEFITS

- Suitable for PE and uPVC pipes, preventing axial pipe pull out
- Range from DN 50 to DN 200 up to 16 bar
- Applicable for all conditions under and above ground use
- New patented restraint system design and assembling method, for easier installation
- Perfect sealing ensured by a double lip seal ring
- Quick, safe and easy installation
- No special tools needed
- Insert is not required, only recommended for PE pipes with thin walls (\geq SDR 21) and low internal pressure
- Reduction of leakage, saving resources
- Resicoat® epoxy powder coating according to EN 14901 and GSK (RAL-GZ662) guidelines
- Blockplus alternative to PE pipe welding:
 - No qualified personnel are required when compared to perform the PE welding procedure
 - Can be assembled independent of the weather conditions, to perform a PE fusion joining the pipe must be dry
 - No special tools are required in contrast to PE pipe welding a welding team with complex equipment is required
